## Cabinet NG Updates Document Management Software For QuickBooks Users

**CNG-Books 2.0 lets accounting staff retrieve electronic versions of financial documents directly from QuickBooks.**

By Small Business Pipeline Staff

[Small Business Pipeline](#)

Cabinet NG, Inc. Tuesday announced the release of CNG-Books 2.0, electronic document management software for Intuit's QuickBooks 2005 small-business accounting software. The software ties into the company's flagship electronic document storage product, CNG 5.0, to help QuickBooks users file and retrieve financial records such as bills, invoices, and supporting data.

CNG-Books users scan paper documents into CNG-Books, which sends the captured data to both QuickBooks and CNG 5.0 simultaneously. Finance and accounting staff can then retrieve the documents electronically directly from QuickBooks without hunting through paper files, and the records are archived in CNG 5.0 in accordance with compliance regulations.

"We help companies improve their processes without disrupting things," said Cabinet NG president Andrew Bailey. "QuickBooks helps you manage the data; Cabinet NG helps you manage the documents."

New features of version 2.0 include support for QuickBooks 5.0, support for Canadian editions of QuickBooks, the ability to retrieve documents directly from QuickBooks, support for both PDF and TIF image formats, support for QuickBooks class assignments, and support for expensed credit card charges.

CNG-Books 2.0 integrates with QuickBooks Pro and Premier Editions 2004-2005, QuickBooks Enterprise Solutions, and Canadian editions of QuickBooks 2005. The software works with any TWAIN-compliant scanner and with PCs running Windows 2000 and above.

CNG-Books 2.0 is sold bundled with CNG 5.0: \$995 for a single-user package, \$1395 for a 5-user package, and \$1895 for a 10-user package. The software is available immediately from Cabinet NG or through the company's network of resellers. More information is available at [www.cabinetng.com](http://www.cabinetng.com).
